

# Single Use & Hybrid Bioprocess Systems

- Alongside our decades of expertise in designing and building systems in 316L SS and higher alloys, Flow Technology has experience in designing and supplying Single-Use and hybrid systems.
- We work with customers to design a system that meets their production plans, whether they want to minimise change-over time, reduce/eliminate the need for CIP, etc.

## System Overview ↑

- Carten Actuated Pinch Valves
- Manual Saint-Gobain Swabable Needle-free Product Out valve.
- Quattroflow SU pump head (Pump model QF44FHT-ADEGNW)
- Malema Sumoflo flow transmitter with PEEK product contact
- Pendotech PREPS-N-15-15 Pressure sensors with polysulphone product contact.
